1:00 P.M. **Handling Shelving Claims: What to Know and What to Look For (Webinar)**
This one-hour course is designed to help adjusters understand why retail displays are considered differently from other constructed elements, including discussion of the industry standards most often cited by experts. Topics will help adjusters understand intended human interactions affecting display design, as well as the unintended human interactions that often lead to accidents and incidents. The most frequent causes of incidents and accidents will be reviewed, along with the steps to be taken in performing a complete incident evaluation, so the adjuster can be in a better position to adjust the claim. Case studies and photographic exhibits accompany each section of the program. Presented by Fahreen Khan, Ph.D., & Benjamin Irwin, P.E. Rimkus Consulting Group, Inc.
